PROFESSIONAL SUMMARY

Information Technology graduate from Taif University (2026) seeking a Junior Web Developer role. Built a full-stack student records web application with PHP, MySQL, JavaScript, and AJAX, and contributed to a Flutter and Firebase mobile app as part of a seven-member team. Completed a two-month summer cooperative training at Smart Methods focused on web and application development. Comfortable using Git and GitHub and documenting projects with README files.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, AJAX, responsive design, right-to-left (RTL) interfaces
Backend & Databases: PHP, MySQL, SQL, database design and management, prepared statements
Project Exposure: Flutter, Dart, Firebase Firestore, Gemini AI API, Google Maps API (graduation project)
Tools: Git, GitHub, README documentation, Linux fundamentals
Academic Knowledge: Networking fundamentals, network security, encryption

TECHNICAL PROJECTS

Student Records Web Application | PHP, MySQL, JavaScript, AJAX | GitHub repository *2026*

- Built a full-stack web application for managing student records, completed as a training task.
- Implemented AJAX-based status updates so records change dynamically.
- Used prepared statements to help protect database queries against SQL injection.

Smart App — Graduation Project | Flutter, Dart, Firebase Firestore, Gemini AI API, Google Maps API

- Cross-platform mobile app with AI-assisted guidance, GPS mapping, and safety alerts, featuring an Arabic-first, right-to-left (RTL) interface.
- **My contributions:** designed the database in Firebase Firestore and worked on the front-end screens and UX flow.
- **Team results:** 16 of 16 planned features delivered across 8 Agile sprints by a seven-member team; 87.5% UAT pass rate.

TECHNICAL TRAINING

Smart Methods — Summer Cooperative Training (two-month placement) *Summer 2026*

- Completed practical tasks across multiple technical learning tracks, with a primary focus on web and application development.
- Documented tasks and project files in GitHub repositories with README files.
- **Selected certificates from the placement:** Full Stack Robotics Engineer; Web Development & Natural Language Processing (NLP); DevOps Fundamentals — Git & Collaborative Development; Linux Fundamentals.

EDUCATION

Bachelor of Information Technology — Taif University *2020 – 2026*
Relevant coursework: databases, software development, networking, network security, encryption.

CERTIFICATIONS & ACTIVITIES

- Fundamentals of Programming and Web Development — Maharah Training Center (30 hours)
- Fundamentals of Database Management — Maharah Training Center (30 hours)
- Artificial Intelligence Basics — Maharah Training Center (18 hours)
- Core Team Member, Google Developer Group (GDG) On Campus, Taif University (2025–2026)
- Member, Programming & AI Club, Taif University (2024–2026)
